

CARGOMAXX | HD™

HEAVY-DUTY COIL SPRINGS

CHEVROLET/GMC APPLICATIONS

CARGOMAXX HD™ heavy-duty coil springs are custom-designed to provide increased load handling capability and improved ride quality. An easy upgrade for vehicles used in continuous heavy hauling conditions, CARGOMAXX HD coil springs are ideal for utility vehicles, pickups, SUVs, vans, motor homes and more.

HD: Designed to carry 35% more load at stock load height

XHD: Designed to carry 70% more load at stock load height

UPGRADE YOUR RIDE

CARGOMAXX HD coil springs improve load handling capability and ride quality of loaded vehicles, while reducing driver fatigue, and increasing safety and efficiency.

- Custom-designed for additional load handling capability
- Improves handling, ride quality and cornering stability
- A must for coil spring-equipped vehicles with diesel engines and/or snowplows
- Excellent load handling solution for fleet vehicles
- No maintenance required
- Reduces driver fatigue
- Manufactured in North America

CHOOSING THE RIGHT DESIGN

Standard vs Variable Rate Suspension Springs

Standard rate (linear rate) springs have one defined spring rate per inch of deflection throughout most of their deflection range. This design is for applications with constant load and empty ride is less of an issue. Features include:

- Constant load
- Added roll stability and safety

Variable rate (progressive rate) springs are generally used for applications with significant load changes and have less effect on empty ride. These springs are easily identified by varied spacing between the coils. Features include:

- Smooth transition for a comfortable empty ride
- Added roll stability and safety when loaded

APPLICATION GUIDE

YEAR	APPLICATION	PART NUMBERS	
CHEVROLET/GMC C30, C35 (Front)			
YEAR	APPLICATION	HD	XHD
1973-87	C30, C35 2WD	350-896HD	
CHEVROLET/GMC C30, C3500 (Front)			
YEAR	APPLICATION	HD	XHD
1988-00	2WD HD Gas Ext 7.4L	350-896HD
